NAAC to overhaul evaluation process

Aurangabad: National Assessment and Accreditation Council (NAAC) director D P Singh said "Universities and other educational institutions are expected to give major thrust on establishing social connect. We have been re-looking at the existing parameters of accreditation in order to include criteria related to human values and ethics in the evaluation method"

Institutions scoring cumulative grade point average (CGPA) in the range of 3.01 to 4 get A grade (very good), while those securing between 2.01 to 3 receive B grade (good). The CGPA in the range of 1.51 to 2 is entitled for C grade (satisfactory), while below 1.5 evokes a D grade (unsatisfactory, not accredited).

"Creation of grades within each grade will give more clarity about institutions' performance in NAAC evaluation. Therefore, grade within a grade such as A, A+, A++ will be created. Such sub-grades will be also formed within other B and C grades" D P Singh said.

Singh also said sending minutes of the meetings of internal quality assurance cell (IQAC) to the NAAC on a quarterly basis would now be mandatory for every accredited institute. He said all accredited institutions would also have to submit the quality assurance report (AQAR) on a yearly basis without fail.

HOW TO MANAGE AUTONOMY EFFICIENTLY

Autonomous institutions face various challenges like conducting exams, enable students to register/withdraw courses online, ambiguity free time table generation, hall ticket generation, speedy announcement of results, grade card, PDC, transcript printing and maintain comprehensive student

database including results and data archival. A comprehensive software solution like IonEMS (Ion Exam Management System) proves to be very helpful for the smooth conduction of exams.

Inorder to conduct faster and efficient evaluation without worrying about human errors like totalling of marks and data archival, IonDVS (Ion Digital Valuation System) can help in conduction of fast evaluation and speedier announcement of results. To achieve NBA accreditation, a platform like IonCUDOS helps in integrating curriculum design, delivery planning, assessment planning and attainment of graduate attributes and provides key inputs to the NBA SAR. Without the use of appropriate software solutions managing autonomy can become a nightmare.

IonIdea bagged orders from 4 Autonomous Engineering Colleges in South India during May - Jun 2016
